SUMMARY

Outgoing and ambitious
graduate. Eager to use my programming experience and communication skills to work as a Software Engineer. To help implement tech solutions and to keep evolving with the team and company.

WORK EXPERIENCE

Two Paged Portfolio   2023

Built my Portfolio by mastering JavaScript
Implemented 3D models with React
Executed email handling with API Handled complex problems

Face recognition website   2023
Developed a Full Stack React App combining all my knowledge
Provided my app with individual profiles using login and score features, keeping track of how many times you used it

Assisted with a database for the user credentials
Assigned a smart API to detect and mark human faces in any photo

Self-filtering website   2023
Assigned a website for a search filter feature
Built with JavaScript and CSS primarily
Improved with external fonts
